

Teldio TruFleet

Track and manage people, vehicles, and assets, both indoors and outdoors using your two-way radio network.

Location Tracking and Fleet Management for Two-Way Radio Networks

Teldio TruFleet tracks, monitors, and manages your employees, fleets, and assets in real-time using a rich and intuitive web-based interface which can be accessed on your desktop, tablet, or mobile phone to improve communication, enhance productivity and increase safety.

LOCATION TRACKING

Track the location of employees, assets, and vehicles, in both indoor and outdoor environments.

MESSAGING

Easily send messages to your employees and specified groups via two-way radio, email, and more.

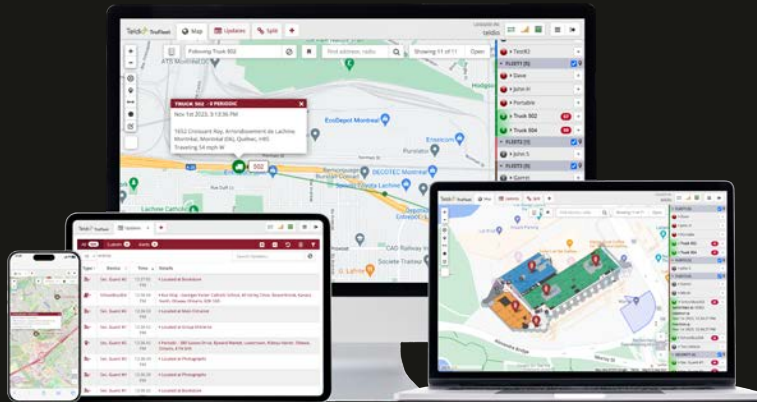

RADIO ACTIONS

Place calls to your radio users or enable/disable radios directly from the TruFleet map for improved response times.

Enhance Your MOTOTRBO™ Radios & Wave-Compatible Devices With Location Capabilities And Automation

Stay connected to your employees, vehicles, and assets around the clock by tracking the location and movements of MOTOTRBO™ radios and Wave-compatible devices. Teldio TruFleet Plus improves communication with your remote workers to enhance productivity ensuring the safety of your employees and valuable assets.

INDOOR TRACKING

Monitor Your Employees' Location and Safety

Track the location of your personnel to quickly find employees in an emergency, or direct the closest person to an event.

OUTDOOR TRACKING

Track Your Fleet and Valuable Assets

Know the location of your fleet of school buses, utility trucks, or any vehicle or asset equipped with a MOTOTRBO™ radio or Wave-compatible device.

Enable Automation Based Geo-Fencing, Locations, and Events

Combine the power of Teldio TruFleet with the Teldio Edge Gateway to allow for seamless automation based on geo-fencing, locations, and events, enabling businesses to efficiently monitor assets, track vehicles, and automate workflows by leveraging real-time notifications and intelligent triggers. Teldio interfaces directly into your existing enterprise systems, integrating your two-way radio fleet with other systems workflows, logistics, supply chain, and operations.
